

SCHOOL OF BUSINESS

— FOUR YEAR PLAN —

ABOUT

The Accounting degree equips students to be effective accounting professionals. The curriculum provides a broad academic background in accounting that allows students to be successful in their future careers in either public, private, or not-for-profit accounting.

Accounting graduates pursue careers as auditors, tax professionals, corporate accountants, financial analysts, bankers, or corporate executives. Central to all of our degree plans is the university mission "to make Christlike disciples through higher education." The accounting program accomplishes this by developing students personally, professionally, and spiritually. Students are expected to complete an internship in their junior or senior year(s) so they can connect what they learn in the classroom to their professional environment.
